IF YOUR jimmy-pipe could talk, it would say: "Fill me with Prince Albert and watch me strut. I'll repay you a hundredfold." No doubt about it, many a pipe has been blamed for things that weren't its fault a-tall. You have no idea how well a pipe behaves on P. A.

On my say-so, buy yourself a tidy red tin of good old P.A. today. Throw back the hinged lid and revel in that fragrance of the world's greatest pipe-tobacco, bar none. Then tuck a nest wad into the business-end of your pipe and light up. There's the answer to every pipe-wish. is, try P.A. Give your pipe a chancel

Cool as a pound-keeper. Sweet as escape from the place he keeps. Mild, but with that full, satisfying flavor of the greatest tobacco that ever tumbled into a pipe. No matter how wide you open the smoke-throttle, there isn't a stop-sign or a detour anywhere.

Nearby is a store where they hand out jimmy-pipe joy in tidy red tins. My advice to you is to make tracks for there at once. Fill your pipe with this glorious tobacco and get the fun that's due you. No matter what your present program

Insulated!

for Kitchen Comfort APPAN In-So-Top

This new-type range insures: {1} cool kitchen; {2} saving of gas; {3} perfect baking of all foods. The oven is insulated to hold the heat, just as your refrigerator is insulated to retain the cold.

Another feature of the Tappan In-So-Top Range is oven centilatson. Tightly sealed ovens impart a "steam cooked" tang — a tang of which one soon tires. Through scientific oven ventilation, the Tappan In So-Top Gas Range entirely overcomes this effect. Foods are at their best when baked in the Tappan In So Top!

Come and see this attractive range - equipped with automatic oven heat control - finished inside and out with beautiful, easily-cleaned enamel - the last word in modern kitchen equipment! It keeps the heat in the oven and out of the kitchen. It adds new pleasure to home baking. And it saves gas.

The Austrian Situation.

The red uprising in Austria seems to be Inder control at least, if not temporatily put If violence does not break out again and a revolution throughout Austria result It will be due to the good sense of the majority of the Austrian people and their love of government and order and in apits of who were responsible for the framing of the treaty of Versailles. Had it not been for the restrictions placed upon Austria by the trusty, there would be little question of the curbing of any revolutionary morement inaugurated by the reds of Austria aided and abotted by those of soviet Russin.

The leaders of the Austrian Socialists and the German appearationists—a term we use to identify the party favoring the joining of Austria and Germany-have warned their followers against the reds, whose aim is to make Austria a second Russia; that continuation of auch violence as marked the uprising means revolution, which was not in the minds of the workers when they started their demonstration and was injected into it by the communist

Those of the framers of the treaty yet in life most at times such as the present tion their judgment in depriving Austria of the armed strengili necessary to quell such disorders quickly and at the same time taking make a livelihood. The uprising must bring home to them the fact that they reasoned proris in assuming that Austria could be enmenace to European peace. They should ruclise that they erred in judgment in dis-mumbering the empire of Austria-Hungary and that the tranquility in central Europe will bemenaced so long as the enforced separation

There can be no question but what Freech statesmanship overplayed its hand in thus attempting to strengthen France by weakening ber foes. Somer or later Austria, if she is able successfully to contend against bolshetikt secults in her weakened condition, is bound to test her fortunes with Germany and Hungary and Austria will again be jeined. This will not come about through the overcoming of the will of the other powers of western and southern Europe, but through the recognition of those powers that no course will work so powerfully for the peace and safety of Europe

The world is beginning to reslize to the full the persecution Austria has suffered, the outrage that has been done to her.

A Long and Successful Career.

A recent reference to these collision to the een; in weich we bold and look have beid to Hiber Manufacturing company as a timeeved Marion institution has brought to by from a long-timé resident of our city some interesting facts, all of which should have been known to us, but some of which were not in the light of these facts, together with there which are matters of our personal company has an unique record insofar as industrial corporations are concerned.

In the Atty-three years of its corporate existence, the company has had but two presidents—Edward Huber, who was elected at the time of its organization in 1874 and serves for thirty years until his death to 1904, and R E. Harlow, who has been the strive head of the organization for the twenty-three years While we can not say for its entire alner existence—not because it len't ao, but simply because we do not know definitely-we can may that, for the last forty-five years it has never detaulted in mosting an majurity and has never failed to pay a dividend to stockholders

As a result, the company today sploys the highest rating for capital and credit to the hooks of the commercial rating companies. it's present capital and surplus are largely made up of carnings, which at no time have seen anactecular, but have been consistently steady from year to year.

The company's product has always kept

abreast or shead of the times. In its exciler years it manufactured hay rakes and dump scrapers. Some years later, it began the manufacture of threshing machines and steam engines, both of which won honors wherever shown in competition. To show the change which has been wrought in the matter of product, the company today doesn't manufacture any piece of machine which it put out during the life of Mr Huber. The mexing of hay rakes and scrapers, it our memory serve us correctly, was abandoned at the time the company moved from its old plant on Sais, Mill) and State Streets to its new plant on Greenwood. The wooden thresher has been superseded by one made of steel and the steam engine has given place to a gasolene tractor In addition, the company is manufacturing a ling of motor collect in five sizes.

Previous to the manufacturing of motor rollers and rerials other road plachines, the output of the company was limited largely to threshing and other farm machinery. Today its product is about equally divided between threshing and road machinery. This tends to stabilise the business and makes the sale of is products less seasonable and at the same time enables the company to operate its facory throughout the year.

The company has been an industrial success from the time of its organization. That, in iteelf, is something of a record, for the aver-age industry doesn't turn out to a success at all. But the story of the success of this one goes back to far that of all its original tacorporators and stockholders but one, Edward Durfer, survives, and he is well past four score and ten

These are some of the reasons why we hold the Huber company in the esteem we do as a Marion industry. It was knowledge of the most of them which caused us recently to voice our esteem. And we believe that this presentation of facts will have the effect of causing those heretofore unacquainted with to feel as we do, and agree that our esteem is justified.

It is pleasing to have in our city an instilution of which one may thus speak.

We assume that the Lindbergh cocktails heing sold over in Europe are so called from the fact that one of them will get a fellow up in the sir."

Eyestrain and Stomach Trouble.

BI ROYAL S. COPELAND, M. D.

There have been so many recent letters asking about eyes not estetewan that I think it will be predictable to any consulting more on this subject. A New Humpshire lady wants to know what eyested a will do to the stomach. Size is quite matriful recourse her determ has given her glasses to help her headache and stomach trouble.

There are two general classes of disease-or this and functional. Organic adments give evi There are two peneral classes of discress—are and cond functional. Organic alments give evidence by a rival change in atructure that something is a rong. For instance, following a varicese condition of the relias, these may be an open uncered the leg. The through are discolared and smollen, the flesh is broken, and the inflamed and discharging other is there to be seen by anyholy who look. This is one example of organic disease.

Cits is one example of organic disease.

These we have painful allments without any local light with light without any local light without any local light without any local light with ligh

of disease. This is a "functional" disturbance. Speaking of the stomach, there are the same classes of disease. There are organic troubles like ulere and cancer, as well as simple information. Then we have another group of symptoms, including suchness at the atomach, contring, bendache and grocest feeling of unfiltness and filters. Everything appears to indicate serious trouble, but, as a matter of fact, it may be purely a functional disturbance. The digestive organ falls to work and yet there is no change of structure or celdence of actual distant.

Perhaps you get sick if you awous in a harmooth. On the water you may get readth. These are functional disturbances and are quite like the functional summet trouble you may have with electrician. It is a remarkable fact, which I have demonstrated in my own experience hundreds of times, that expertent in a real factor in what we sometimes call "nervous dyspepsia." It would not count in examine diseases of the stometh, of course. In the cellet of indigestion you must remove evertiming which may fewer the likality or depress the nervous system. Electricia is one out thing it is augmentable like the proper litting of a pair of glasses.

It is a nice thing to be well satisfied with one's own ways. It mokes for complicating, and it gives that a little amazement to the other fellow. Take the Teronto Mail and Empire—it likes uself fine. Contexplaining condensemingly the American public's tractions to President Coollide's vacation, the Torontian editor remarks:

"In nothing do the Canadian people differ from their American neighbors more than in the treatment of their public hen. Perhaps the difference is not so much between American and Usualian succeptibility on this point as between American usage and that of the cert of the civilized world. The American swople are so containated that they take an almost breathese intenses in the most commonly are of the president's discuss, while his casual tone at most contained as though freighted with the arelien of Marcus Aurelies.
